

GAURAV PUNETHA

📍 Pune, India | 📞 9650586822 | ✉️ gpgauravpunetha123@gmail.com

PROFESSIONAL SUMMARY

AI Engineer with 2+ years of experience developing and deploying production-grade Agentic AI applications using Python, FastAPI, LangGraph, LangChain, Claude API, and RAG. Expert in building enterprise AI copilots, multi-agent workflows, reusable automation components, and human-in-the-loop systems. Proven track record optimizing enterprise applications with telemetry-driven monitoring using LangSmith, prompt engineering, secure vector databases, and scalable Azure cloud deployment.

CORE COMPETENCIES & TECHNOLOGY

Programming & Frameworks: Python, FastAPI, REST APIs, Async Python, Pydantic, JSON, PostgreSQL
Agentic AI & LLMs: LangGraph, LangChain, Claude API, OpenAI GPT-4, Multi-Agent Systems, Tool/Function Calling, Structured Outputs, Prompt Engineering, Human-in-the-Loop Workflows, MCP Concepts
Retrieval & Automation: Retrieval-Augmented Generation (RAG), ChromaDB, Pinecone, Embeddings, Semantic Search, Knowledge Retrieval, Workflow Automation, Enterprise API Integration, OAuth2, Webhooks
Monitoring & DevOps: LangSmith, Telemetry, Tracing, Prompt Evaluation, Azure App Service/OpenAI/Bot Service, Docker, Git, CI/CD Fundamentals

EXPERIENCE

LTIMindtree

Agentic AI Engineer

Jan 2024 – Apr 2026

Pune, India

- Deployed a production-grade AI Procurement Copilot using LangGraph, FastAPI, Claude API, and Azure, enabling seamless natural language knowledge retrieval and reducing manual support effort.
- Engineered reusable Agentic AI workflows with tool calling, function routing, and persistent state management to automate operations, improving maintainability and system scalability.
- Developed RAG pipelines using vector embeddings, ChromaDB, and semantic search across enterprise documentation, delivering grounded responses and mitigating hallucinations.
- Built reusable FastAPI services and SAP integration connectors using OAuth2 authentication, enhancing secure interoperability between internal legacy systems and AI workflows.
- Implemented structured tool validation via Pydantic models, securing API execution and eliminating runtime failures in high-throughput production environments.
- Developed human-in-the-loop workflows for sensitive operations, enabling user validation before enterprise API execution to preserve tracking and auditability.
- Leveraged LangSmith telemetry to trace LLM interactions, monitor workflow execution, and analyze token usage/latency to drive continuous application performance optimization.
- Collaborated with cross-functional stakeholders, solution architects, and technical teams to translate business constraints into automated solutions following strict secure software engineering standards.

PERSONAL PROJECTS

Enterprise AI Helpdesk Automation | *Make.com, Claude API, Workflow Automation*

- Designed an enterprise solution that automated incoming support mail classification, priority routing, and structured summary generation via Claude API, minimizing manual triage overhead.

Multi-Agent Market Research & AI Use Case Generator | *LangGraph, LangChain, Gradio, Tavily API, Claude API*

- Architected a supervisor-coordinated multi-agent system (Research, Analyst, Report Generation) using Tavily Search API and ChromaDB vector embeddings to deliver comprehensive business intelligence reports.
- Built an interactive Gradio app with streaming updates and Markdown generation, reducing end-to-end research execution time from 6 hours to under 12 minutes.

EDUCATION

DIT University

Bachelor of Technology in Computer Science Engineering (CGPA: 7.67/10)

Aug 2019 – Jul 2023

Dehradun, Uttarakhand

ACHIEVEMENTS & CERTIFICATIONS

- Recipient of the **LTIMindtree SuperCrew Award (Feb 2025)** for delivering high-impact enterprise AI solutions.
- Completed **Hugging Face Agents Course** (Agentic AI, Multi-Agent Systems, Tool Calling, and AI Workflow Orchestration).
- Certifications/Training: Azure AI Fundamentals (Preparing), Production LLM Engineering (FastAPI, LangGraph).
