PROFESSIONAL SUMMARY

Generative AI Consultant with 2.3+ years of experience delivering AI-driven enterprise solutions across Supply chain, manufacturing, and enterprise IT domains. Skilled in designing and implementing agentic AI systems using FastAPI, LangGraph, chatgpt API tool-calling, and ERP-integrated AI solutions with SAP MM and SAP BTP Integration Suite. Experienced in building AI-powered workflow automation platforms, Microsoft Teams AI assistants, and multi-agent research systems focused on operational efficiency and enterprise process optimization. Hands-on experience across the complete SDLC including requirement gathering, solution design, API integration, Agile sprint delivery, deployment, testing, and production support within cross-functional enterprise environments.

CORE COMPETENCIES & TECHNOLOGY

Gen AI & Agentic Platforms: (Guardrails, Retriever, Reranker), OpenAI GPT-4, Claude API, Gemini API, LangChain, LangGraph, RAG, MCP, Faiss, Pinecone, Gradio, Tavily API, LLM Tool Calling, Agentic Loop Design

Package & ERP Integration: SAP MM (Procurement, PO, Vendor Master), SAP BTP (Integration Suite, Cloud Integration, API Management, Process Integration Runtime), Azure Bot Service, Microsoft Teams Bot Framework, Airtable, Make.com, Slack/Teams, Google Workspace APIs

Implementation & Dev: Python, Fast api, FastAPI, REST/Webhook integration, OAuth 2.0 Client Credentials, PostgreSQL, Docker, AWS (EC2, S3, Lambda), Azure(web app) .

CONSULTING EXPERIENCE

LTIMindtree

Generative AI Consultant – Package Implementation

Jan 2024 – Present

Pune, India

- **Agentic SAP Procurement Bot (FastAPI, Azure Bot Service, SAP BTP):** Developed an AI-powered Microsoft Teams procurement assistant using FastAPI, Claude API, and SAP BTP Integration Suite to automate PO status lookup, delivery tracking, and vendor-based procurement queries through multi-step agentic workflows.
- **LLM Tool-Calling Workflow Orchestration:** Built reusable SAP tool integrations with structured JSON schemas and implemented dynamic tool-calling workflows enabling autonomous SAP operations such as vendor search, PO lookup, and delivery ETA retrieval without hardcoded query-specific logic.
- **SAP BTP Integration Suite & CPI Integration:** Configured and deployed SAP Cloud Integration (CPI) iFlows for procurement operations, including PO status, open PO search, and delivery tracking with OAuth 2.0-secured API endpoints.
- **Secure Cross-Cloud Authentication:** Implemented OAuth 2.0 Client Credentials flow between Azure Web App and SAP BTP using secure environment-based credential management, automated token handling, retry logic, and API error management.
- **Agile Development & Enterprise Deployment:** Worked in Agile sprint-based development using Jira, contributing to backend API development, SAP integration testing, deployment validation, logging, monitoring, and production support activities across Azure and SAP BTP environments.

PERSONAL PROJECTS

AI Helpdesk Triage & Routing | *Python, LLM APIs, Email Automation*

- Automated the initial triage phase of IT support by intercepting incoming support emails and validating against client-specific SLA and impact rules; achieved zero manual intervention for high-impact tickets with AI-determined priority classification and resolution team routing, with conditional escalation logic to minimise alert fatigue across support tiers.
- Leveraged LLM APIs to assess ticket priority, business impact, and routing decisions in real time; implemented rule-based override to escalate only genuinely critical incidents to human agents, optimising first-response SLA adherence while reducing false-positive escalations by design.

AI Research & Market Intelligence System | *LangChain, LangGraph, Gradio, Tavily API* | Live Demo

- Developed a multi-agent AI research system using LangChain, LangGraph, and Gradio to automate market analysis, AI use case generation, and resource discovery workflows across diverse industry and business domains; outputs delivered as structured research reports and downloadable Markdown artefacts with competitor intelligence and AI/ML solution recommendations.
- Implemented agent orchestration pipelines integrating Tavily web search APIs with LLM-based reasoning to generate sector-specific use case libraries, competitor insights, and technology adoption recommendations; automated end-to-end research workflow reducing manual business development research effort significantly.

EDUCATION

DIT University

B.Tech in Computer Science Engineering (CGPA: 7.67)

Aug 2019 – Jul 2023

Dehradun, Uttarakhand

ACHIEVEMENTS

LTIMindtree SuperCrew Award for Excellent Performance — Feb 2026
